Dear Friend,

I would like to take this opportunity to invite you to partner with us in our battle to find a cure for Parkinson's disease by attending and exhibiting at Team Fox Detroit's Research Salon on Saturday, September 10, from 10 am–12 pm at The Henry Hotel, Dearborn, Michigan. Representative from Michael J. Foundation along with University of Michigan and QUEST Research will be presenting an update on research advancements and accomplishments of PPMI along with opportunities to get involved and help move research forward. In addition to learning more about this exciting progress you will hear from patients who are currently in clinical trials. We would be honored for you to display your goods and services that can educate Parkinson's patients and families on services that are available to help those living with Parkinson's easier.

The Parkinson's Progression Markers Initiative (PPMI) is the study that could change everything about Parkinson's disease. The Michael J. Fox Foundation launched PPMI in 2010 to better understand Parkinson's and advance new treatments. Since then, the study has changed how research is done and what scientists know about the brain. It is a cornerstone of our understanding of disease and has heavily influenced clinical trials.

PPMI follows people — with and without Parkinson's — over time to learn more about how disease starts and changes. That information may lead to insights and tools that can help better diagnose, treat and even prevent brain disease. The study shares its data set — the most robust in Parkinson's research — with scientists to speed breakthroughs.

Today, with more therapies in testing, PPMI is expanding. The study has added an online platform to gather data from more than 100,000 people. It is following volunteers at more sites in more countries. More data can help advance us closer to better treatments and prevention.

Since inception in 2016, Team Fox in the D has raised \$1.2M for Parkinson's research – 100 percent of which went directly to the high-impact research programs at MJFF. As a partner in Parkinson's disease we would be honored to have you display your business information to our attendees and their families. Whether someone is newly diagnosed or has been living with Parkinson's disease it is important to have this information available to them within their community. As a service to our community, your Exhibit space is complimentary, with option for you to donate if you so desire.

If you would like to be a participant please contact us at info@teamfoxinthed.com as space is limited. If you cannot participate you can make a donation at www.teamfoxinthed.com.

Thank you,

Donna Rajkovic
